WHITEPAPER

LEGAL DISCLAIMER

Please study the following legal disclaimer section in full. It is incumbent upon an individual or entity (which henceforth shall be inclusive) to comply with all legal, financial, tax and all other laws and to consult with a certified professional before making any pertinent decision. All information contained herein is in no way exhaustive and does not constitute in part or whole any contractual relationship, explicit or implied. It is our full intention that the information in this white paper is accurate and up to date. However, all such information and materials including but not limited to products, services, technical architecture, token distribution and company timelines are subject to change at any time without notice and can never be considered part of a binding agreement or professional advice. New information will be made available for private and public contributors and may appear outside of this white paper and is subject to all rules outlined in this disclaimer.

This white paper does not bind or compel any individual to enter into any contract, contribution, purchase, or binding legal commitment. Furthermore, no sales, contract, cryptocurrency or any form of payment can be accepted based upon this white paper. In addition, this white paper does not have any capacity to render any of the aforementioned as binding legal commitments to the contribution of the whitepaper or any pertinent expectations. This white paper does not constitute any form or opinion which can be considered advice or solicitation including but not limited to purchasing our token, nor shall it be considered to play a part in any effect leading to - and including - a contract or investment decision.

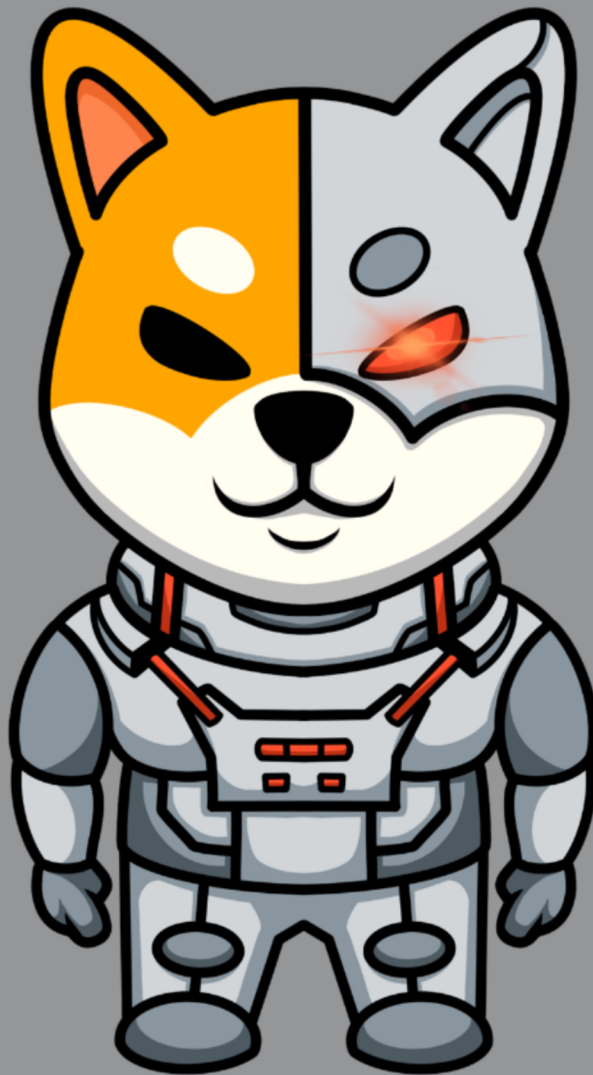

The white paper has not been examined or approved by any regulatory authority or legal firm. All information in this white paper is not subject to any law and cannot be taken under any regulatory or legal authority or any rules of jurisdiction. It is hereby announced that its publication, distribution and dissemination do not apply to any laws, regulatory requirements or rules.

ABOUT

A CYBORG SHIBA INU DOG FROM PLANET SHIBAMOON X1000.
A DECENTRALIZED MEME TOKEN.

He is a hybrid of a biological organism and a machine. He is a highly developed dog whose body has been permanently supplemented with artificial components. He is a cybernetic organism and a technically modified biological life form and fights for the alliance to maintain the balance in the crypto universe.

LEADING-IN

Cryptocurrencies are different from currencies like the euro or dollar. This means that they are not subordinate to an organization or authority and are therefore theoretically stable against value influences by individual parties in the market. In addition, cryptocurrencies are characterized by the fact that they are managed decentrally and offer a high degree of security, speed and privacy.

In practice, this means that anyone with internet access can buy crypto currency from anywhere, can trade crypto currency - for example via CFDs - and send money to other people without incurring disproportionate fees.

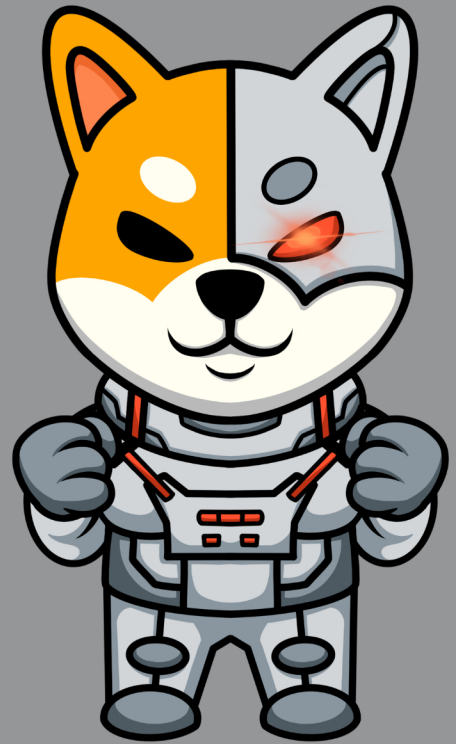

“What is a cryptocurrency?” can therefore not only be answered by giving you the opportunity to make payments over the internet safely and quickly, but also by saying that the money is a means of payment that is completely used by the general public and is not controlled by an authority.

ECOSYSTEM

SHIBORG INU (\$SHIBORG) is a Decentralized Finance (DeFi) token on the Binance Smart Chain (BSC).

Unlike projects heavily dedicated to farming, liquidity pool acquisition, we aim to avoid messy price fluctuations as much as possible.

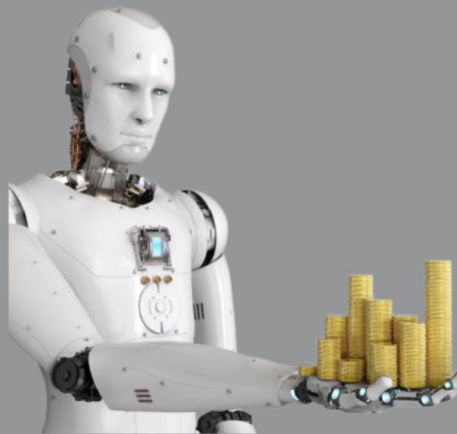

AUTOMATIC STAKING

With SHIBORG INU 2% is redistributed to all holders as Part of Automatic Staking. This is done to reward holders and our home on the Binance Smart Chain is the perfect place to do it!

The most evident benefit of Autostaking is that of all the other staking methods it has the smallest technical learning curve and the least amount of fuss.

Shall we dig a little deeper? Let's go!

STAKING BENEFIT

As promised, here are some quantifiable benefits of autostaking with the SHIBORG INU:

NO HARDWARE REQUIRED

Unlike Proof of Work (PoW), Proof of Stake requires no equipment or hardware, nor the associated costs of purchasing and maintenance.

PASSIVE INCOME

In the stock market, brokers get paid a certain percentage or fee for every transaction. Here, each and every transaction pays you, the holder! In addition, tokens are added automatically to your wallet, and the more you own, the more you earn! Think of it as a cross between commission and a Dividend Reinvestment Plan! Sit back and enjoy the ride.

SCALABLE

In the Blockchain world, 'scalability' refers to a computational process's potential to handle a large amount of throughput. Proof of Stake protocols, as shown by Baby Doge Billionaire Token's high transaction outputs and lower fees, make for great scalability and therefore seamless autostaking.

ECO-FRIENDLY

One of the major benefits for Proof of Stake (holding the TOKEN) is helping the environment by cutting down on the high energy consumption of hardware usage and using an energy-efficient platform such as Binance Smart Chain.

COST-EFFECTIVE

Not only are Proof of Stake (PoS) blockchains less expensive platforms for transactions relative to Proof of Work chains, but the inherent unstable financial risks in crypto-mining do not exist in PoS, which is more reliable and consistent.

HIGHLY SECURE

In addition to being the largest crypto exchange by trading volume, the Binance Smart Chain ensures safety by leveraging effective security measures, providing a Secure Asset Fund for Users (SAFU), a secure wallet and a double-checking system for you to autostake \$SHIBORG.

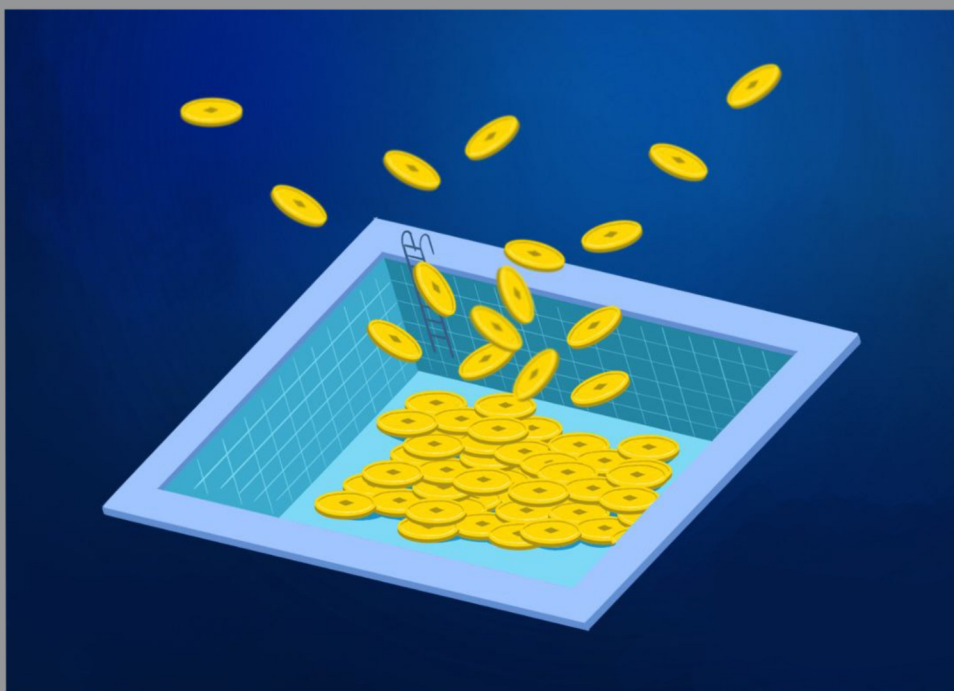

AUTOMATIC LIQUIDITY

The Automatic Liquidity function serves a two-pronged benefit.

As the contract collects tokens from both buyers and sellers and sends them to the Liquidity Pool, it nurtures a stable price floor. And the second benefit of this transaction penalty is that it discourages arbitrage, supporting a healthier, safer and more vibrant volume for the holders.

If we think of the Liquidity Pool as the foundation that keeps the system "afloat", we can make a model comparison to burn functions, which only carry a short-term benefit from a supply decrease. Why short term? When whales tend to sell large positions or take profits, a burn function will have noticeably little to no effect at that moment since it is the Liquidity Pool that supports the ecosystem. By sending 8% of those sales to the Liquidity Pool, a better cushion is formed.

SHIBORG INU NFT

SHIBORG INU
Meme NFT Platform

We are creating a unique, unprecedented NFT platform, especially for meme tokens.

Here investors and anyone who wants to come together can exchange and trade their meme NFTs.

WHAT EXACTLY ARE NFTS?

NFTs (non-fungible tokens) are unique, noninterchangeable assets, minted on-chain. The core attributes of NFTs, such as their verifiable uniqueness and indivisibility, grant them special value and categorically separate them from other asset types. The transparent nature of the underlying code means that the scarcity and ownership of any given token are self-evident, eliminating the need for a trusted intermediary. We view the emergence of NFTs as a continuation of the paradigm shift from centralized to decentralized systems. This framework is now unlocking fresh business models for the creators of digital and physical collectibles.

The creation of each NFT encodes a unique genome that defines its ultimate appearance, traits, ownership and hereditary lineage, even as it changes. Any Shiborg Inu NFT cannot be replicated and cannot be transferred without the user's permission.

WHY LEAP INTO NFTS?

Transparency, authentication, ownership, provenance, copyright and forgery have been prevalent issues in the art and music industry. Moreover, historically, acquisition of art and music ownership had been restricted to elites who had the means and millions to invest. It is without question that art and music were not meant to be restricted in that way and were intended to be owned and enjoyed by anyone, transcending all social and economic barriers.

Fortunately, with our designed ecosystem, such obstacles become nearly obsolete. We live in an amazing time, when the art and music industry creates and deploys incredible and sophisticated pieces.

CHARITY

As a charity measure we will regularly donate to various institutions and also people in need. We let the community choose and vote on it.

We will provide some options for investors to choose from. The selection with the most votes will then receive a donation.

There will of course also be evidence of this. We are very happy to be able to help people or animals in need.

SHIBORG INU SWAP

With SHIBORG INU Swap, you could exchange crypto in your Private Key Wallet or your Trading Account. Swapping from your Private Key Wallet provides the benefits of non-custodial, on-chain trade settlement. Conversely, swapping from your Trading Account provides faster settlement and no network fees.

There are many great reasons to love the Swap:

- Quickly swap into an asset you believe will grow
- Move out of a volatile asset into a stablecoin
- Hedge against real-world events
- SHIBORG INU Swap platforms are designed to integrate with the world's top cryptocurrency trading exchanges, allowing users to search and accurately select the best rates for the transaction.

MEME TOKEN EXCHANGE

SHIBORG INU will break open a portal of FIRSTS in the Memecoin space. We will revolutionize the Memecoin space by developing a fully fledged state of the art Exchange to be a collective home for all new and old Memecoins. We aim to build a central HUB in which those willing to take the dive are able to do so in a more safe and secure environment. Verification processes will be passed and certain coins will be approved to maintain a high sense of safety for all investors. We will operate the Exchange via a small fee when trading and incorporate a large inventory of tools and gadgets to make the trading experience attractive for all users.

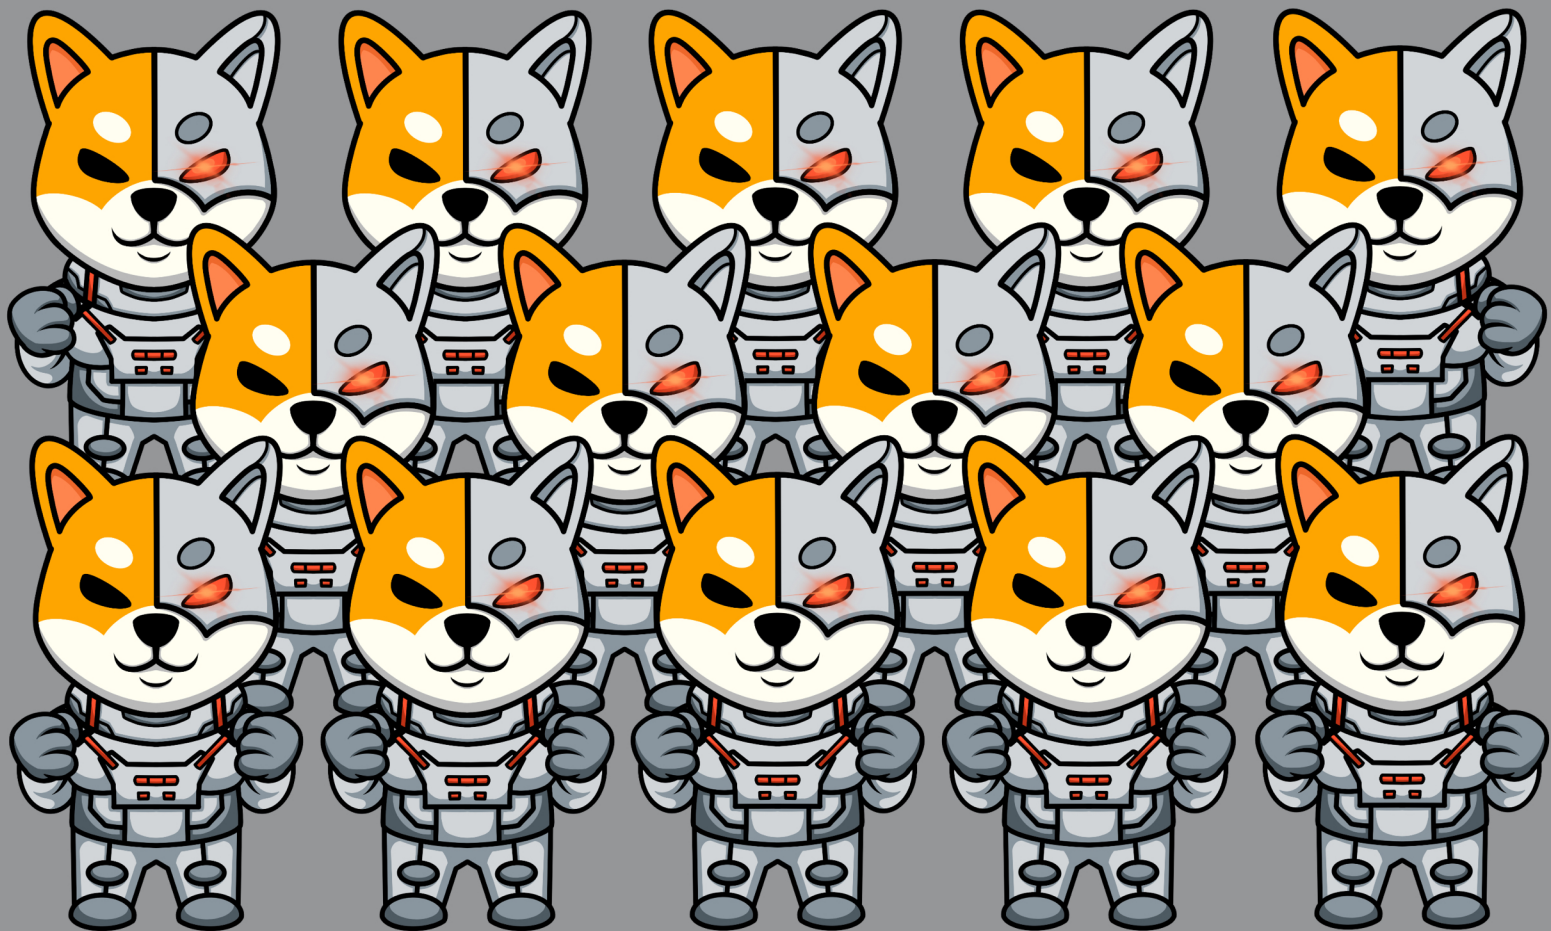

TOKEN DETAILS

Max Supply: 1,000,000,000,000,000

Circulating Supply: 1,000,000,000,000,000

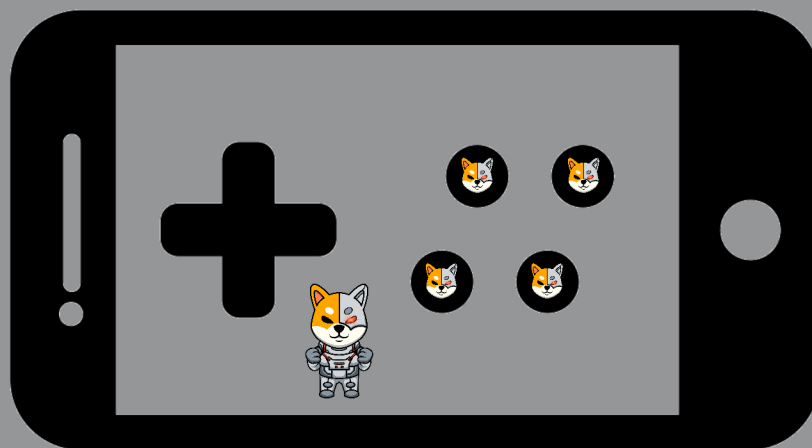

Redistribution to Holders (Reflections): 2%

Automatic Liquidity: 8%

Mini Games to earn Shiborg Inu

We will develop a unique never seen before meme-oriented minigames platform for desktop and your mobile phone. Yes, you heard that right, a platform wherein holders of SHIBORG can actually invest their time into the game as working product of the SHIBORG team! These minigames will be used utilizing the SHIBORG token and holders will be able to gamble their tokens for that lucky chance of hitting the jackpot or just earning extra tokens for their time!

SPACE MAP

PHASE 1

- Design, Graphics
- Development (Contract, Website)
- Presale
- Launch
- Airdrops, Giveaways
- Big Marketing Campaigns
- Coingecko Listing
- Coinmarketcap Listing
- 5000 Holders

PHASE 2

- More Marketing Campaigns
- Influencer
- Various Adds, Social Media Presence
- Great Promotions For The Community
- 10.000 Holders

PHASE 3

- Big Airdrop Campaign
- Cool Merchandise (Clothing And Other Items)
- 25.000 Holders
- Special Marketing Campaigns
- Centralized Exchange Listing

SPACE MAP

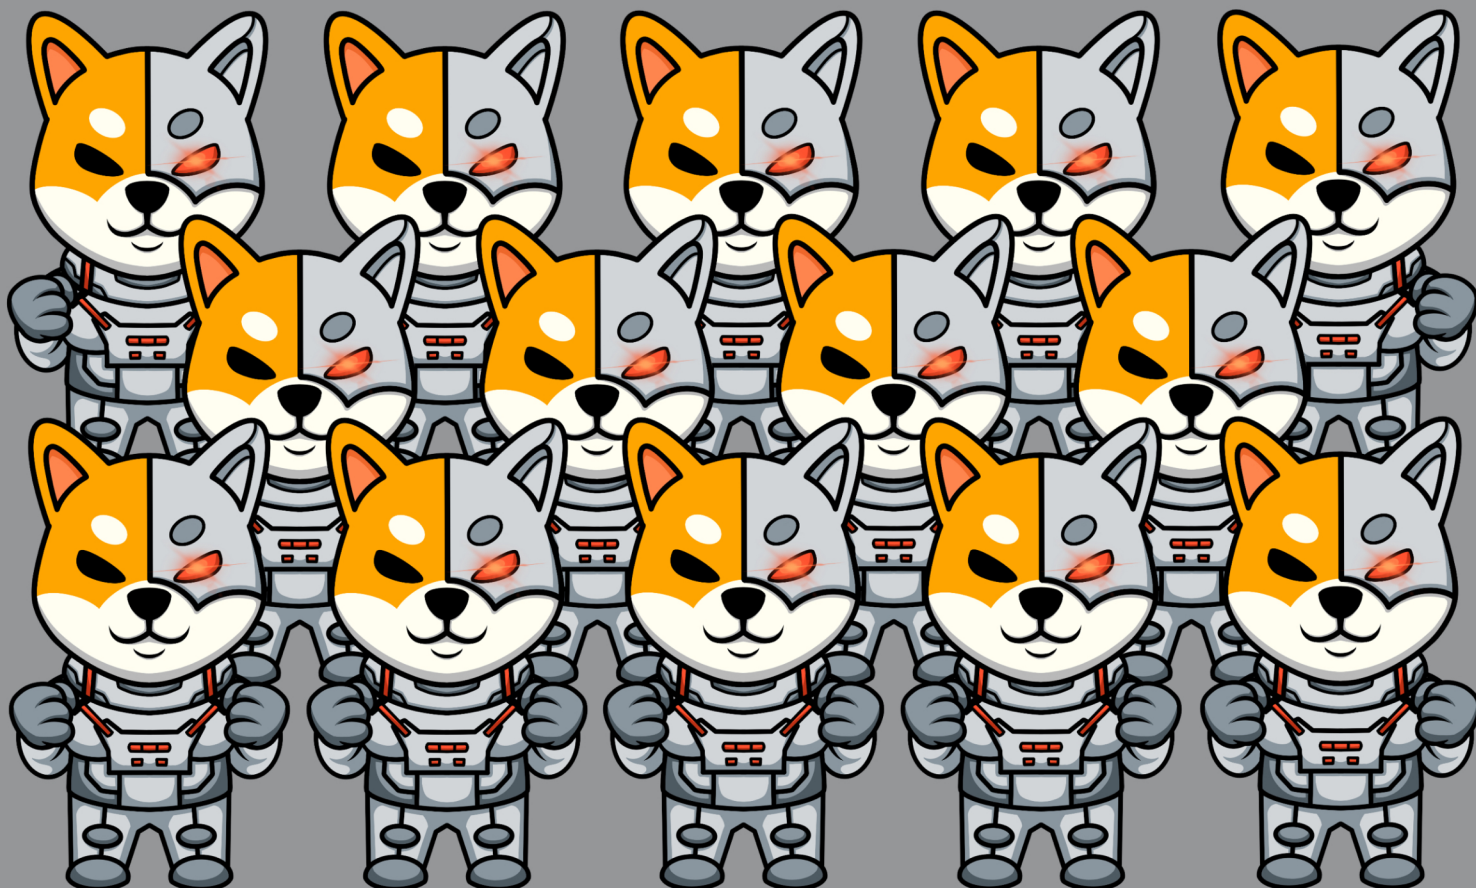

PHASE 4

- Big Marketing Plans
- Mini Games To Earn Tokens
- Special Meme NFT Platform
- More Tier 1 and 2 Exchange Listings
- 50.000 Holders

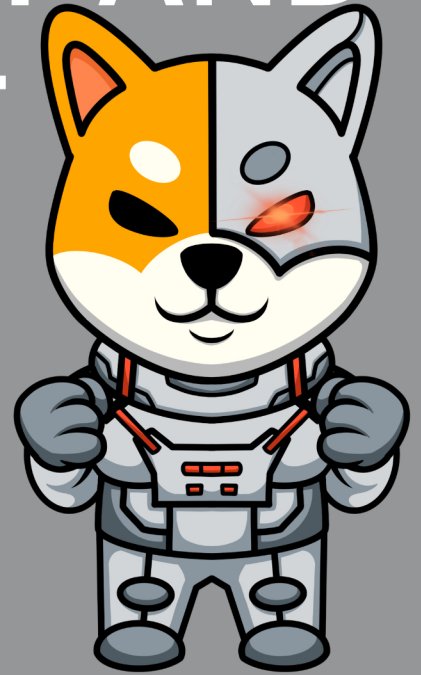

PHASE 5

- Mobile App With Wallet
- SHIBORG INU SWAP
- Own Unique Meme Token Exchange

TRANSPARENCY AND SUPPORT

Shiborg Inu values transparency above all. Our clients will have access to all the services they need from a single platform. Our community is gifted with the opportunity to grow financially and receive better returns in a transparent and decentralized way through the revolutionary technology known as Blockchain.

LET'S SUM IT UP AGAIN

Community Driven:

There is a saying: "you keep the limits you set." Community decisions, participation, unity and growth give life to the Shiborg Inu ecosystem. We cannot wait for you to participate in our fun and creative environment and become part of the journey!

Auto-Rewards/ Liquidity:

Each transaction provides a 2% redistribution among all Shiborg Inu holders and you can watch your wallet grow! 8% is for the liquidity pool to make the price very stable and allow it to rise up even faster.

— THANK YOU FOR —
